

**Dr. YOSHIDA Junichi** is Director of Chemicals and Fuels Section, Carbon Recycling Unit, Circular Economy Department at NEDO (New Energy and Industrial Technology Development Organization), which is Japan's largest technology projects management organization affiliated with METI (Ministry of Economy, Trade and Industry). He oversees NEDO-funded research, development and demonstration projects for carbon conversion and utilization, also known as carbon recycling, including the Carbon Recycling RD&D Base project at Osaki Kamijima. Since 2005, he has been engaged in management and support of government-funded research and development projects in various technology areas including biotechnology, critical material recycling and artificial intelligence, at NEDO and the Cabinet Office of Japan. From 2014 to 2018, he was based in the USA as the Deputy Representative of NEDO's Washington DC Office and supported facilitation of discussion and coordination between industries and academia of both nations for future cooperative opportunities.

Dr. Yoshida earned a Ph.D. in biology from Kumamoto University and a master's degree from Kyushu University.
